

A summer of Astroparticle Physics

The 37th International Cosmic Ray Conference (<https://icrc2021.desy.de>) will take place from 12-23 July 2021. This conference series has been organised biennially since 1947 and is the largest conference on Astroparticle Physics. The ICRC 2021 will be a prime forum to learn about news and developments in Astroparticle Physics and to appreciate the links between its topics. This time the ICRC is an online conference which requires a massive computing infrastructure to accommodate more than 1400 contributions, around 2000 participants from all over the world, talks, discussions, posters, social interactions, chats and video streams on various digital platforms.

Join us at the ICRC 2021 Mission Control

Technical helpers are needed to ...

Support of the chairs of the event sessions, set up and supervise video conference rooms (Zoom), configure and start the session, check and archive recordings, manage poster sessions and small-group meetings (Remo), load and use our video archive (VIMP) or support participants on technical help-lines.

Schedule

June 2021	start of online training
05.-11. July 2021	prepare the online conference materials
12.-23. July 2021	support conference sessions (~6 hours/day)

Become Part of the ICRC2021 Team?

Requirements:

- You have time in the specified periods (ideally throughout the conference)
- You are tech-savvy
- You communicate confidently in English
- You can provide a friendly and patient customer service
